

Fullstack Developer

ES-14234

In the IT Services area, Our Partner implements the best in class solutions in the Business 4.0 era to enable strong digital foundations for our customers worldwide. They are working with a wide range of technologies and programming languages.

This position will be part of the cloud native application development portfolio. The associate will work on modern web applications, deployed in cloud environments (AWS or Azure or Google Cloud). The associates will be part of the Center of Excellence group dedicated towards cloud services and cloud native development. Members of this group are horizontal in our organization: cross-client and cross-project, focusing on mastering the latest technologies and providing consultancy and technical leadership across our portfolio.

About what you would be doing:

- Develop web application backend software using Java, Spring Boot framework
- Develop web application frontend or fullstack software solutions using Javascript, Node.JS, React frameworks
- Make sure to work according to the latest coding principles and guidelines
- Ensure high code quality and code coverage
- Understand architectural issues, and factor them into decisions and recommendations
- Own software design, collaborate within development team
- Implement and work with automated CICD solutions and DevOps tools
- Write good documentation
- Report and track progress in standard ticketing and documentation frameworks (e.g. JIRA or Confluence)
- Participation in employer branding or academic relations related events

Requirements:

- Degrees: BSc in IT related fields
- IT skills (in details with required levels, years of experience):
- Experience of developing backend application using Java, Spring or Spring Boot
- Extensive knowledge on RESTful APIs and microservices architectures. Event driven architectures
- Any good experience with SQL and noSQL databases
- Secondary requirement 2-3 years of experience developing frontend web application using Javascript or Typescript with HTML, CSS. Preferable knowledge on Node.JS, Angular or React.
- Experience with DevOps practices and tools, CICD and Infrastructure-as-Code solutions
- Experience in the execution of certain tasks
- Software development, testing and documentation (3+ years)
- Software architecture and UI/UX design (1-2 years +)

Advantages:

- Knowledge on cloud native software development
- Cloud certification (AWS, Azure or GCP)

These are some of the benefits you will enjoy:

- Attractive salary & benefits
- Pleasant work atmosphere: open office environment, relax rooms, cafeterias, kitchens and terraces
- Job security: Our Partner guaranteed the job to all employees during pandemic
- Get in the shape: 24 hours free gym facilities
- Career growth opportunities: 70%+ of leadership roles fulfilled by internal promotions
- Best diversity of workplace - 99 Nationalities
- Opportunity to volunteer in the corporate social responsibility
- Opportunity to network with 500,000 associates in the organization
- Work-life balance: Home office opportunities
- Learning opportunities: Internal learning programs, alliances with LinkedIn learning, Udemy and others
- Be part of a real multinational team and environment (90+ nationalities)

- Develop your career path and grow domain wise (vertical and horizontal opportunities for growth and rotation among different units)
- Learn and develop soft and hard skills (1000+ internal training)
