

Intermediate/ Senior Backend Developer (Java)

ES-14354

About the Job:

The scope of our work would be to support and maintain the client's financial system across Europe.

You will be part of the transition for the backlog and non-backlog applications, and will play a major part in the release cycles and also in the application enhancement.

Possibility of home office or office work. Travel to client locations is also in scope (1-2 occasion per year).

The key requirements for the role are:

- Degrees: Any BSc or MSc degree, or similar qualification
- 3-6 years of relevant experience
- Experience with responsive and/or adaptive design
- Java 8, Java 11, J2EE knowledge
- Web services
- Knowledge about professional software engineering (SOLID-principles, Clean Code, Separation of Concerns, Design patterns)
- An appreciation for good development practices (TDD, pair programming, continuous integration)
- Ability to constructively discuss ideas in a team and generate understanding for your proposed solutions
- Driving the design and development of web applications implementing backend functionalities

- Having a keen eye on documentation, consistency and modularity of our code base
- You are familiar with popular backend frameworks
- You have shown that using SQL and NoSQL databases, designing REST APIs, testing and debugging are no challenges for you

The key Responsibilities for the role are:

- Responsible for design, developing, and unit testing application in accordance with established standards: Software Requirements Specification and the Software Architecture
- Work with business and client's technical leads on extending, designing and implementing solutions to achieve the team & organization's common goals
- Adhere to high-quality development principles while delivering solutions on-time and on-budget
- Use specialist skills and experience as Intermediate Developer to plan, design, develop, test, and maintain business application and, collaborate with Senior Developer/Architect and product owner and other stake holders on a product team
- Build and drive an agile development team and contribute in their work on developing world leading products/technologies
- Analyze user requests and assist in the design and implementation process for new products/projects, informing senior executive of alternatives
- Implement solutions that are reliable, scalable, and perform at a high-level to meet the service levels associated with mission-critical web-based solutions

These are some of the benefits you will enjoy:

- Attractive salary & benefits
- Private Health Insurance
- Pleasant work atmosphere: open office environment, relax rooms, cafeterias, kitchens and terraces
- A financially healthy company
- Get in the shape: 24 hours free gym facilities
- Career growth opportunities: 70%+ of leadership roles fulfilled by internal promotions
- Best diversity of workplace - 99 Nationalities
- Opportunity to volunteer in the corporate social responsibility
- Opportunity to network with 500,000 associates in the organization

- Work-life balance: Home office opportunities
- Learning opportunities: Internal learning programs, alliances with LinkedIn learning, Udemy and others...

Location: Budapest/hybrid
