

## Lead Back End Developer

ES-14206

---

The ideal candidate will be responsible for designing, developing, testing, and debugging responsive web and mobile applications for the company. Using JavaScript, HTML, and CSS, this candidate will be able to translate user and business needs into functional frontend design.

### **About what you would be doing:**

- Participate in every phase of the digital solution lifecycle: actively contributing to the development at every step; grasping the real problem, designing technically the most relevant solution
- Strongly collaborate with digital colleagues (software, embedded software, math, product owners) and colleagues of Laborelec (mostly engineers and technicians) in a fast-paced, agile environment, as a team, committed to delivering maximum business value to the end customer

### **Requirements:**

- Degrees: Master degree in Computer Science (or equivalent)
- Excel in programming: importance of code quality; correctness of algorithms and code; code clarity & comments; code reusability; unit testing; correct use of design patterns
- An expert in a programming language (preference for Python or Java under Linux), including the understanding of the behind-the-scene operations performed by the language. Expertise in the following technologies is a plus: Gitlab, Vagrant, Conda, Ansible, Kubernetes, Kafka, Redis, AWS cloud, MongoDB, InfluxDB, Elastic search, Nginx, Flask, swagger, pytest, oAuth2, SSO, NewRelic, Fluentd, ...
- Strong Business English
- Nice to have: advanced French/Dutch knowledge
